

CBS

# Today's In Class Assignment

- Objectives:
  - Walk through the code required for Chapter 2 Notes
  - Run the code using the library resources
  - Publish the code and the results, upload to Canvas, Assignment 6

# Running chapter\_2\_2019.m

- STOP!!!!
- Don't run the program until you look at the data files first
- Then, update the info at the top of the file to indicate this is your version of the code
- Type chapter\_2\_2019 in command window
- Should run without any errors and generate a bunch of figures
- You will need to go through and update the titles for each figure to include your name
- If not, let me know!

# Steps

- Getting the data
- Histograms and cumulative frequency diagrams
- Central value, spread, and symmetry
- Transforming data
- Smoothing data

# Publishing Your code and results

- This is an important step to do
- Click on Publish
- Select Edit Publish Options
- Change Output File Format to pdf
- Run `chapter_2_2019.m` again
- Verify that a pdf with the code and the figures is created
- Upload to Canvas
